	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3612

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the linkage mechanism arranged and constructed to pivotably and slidably couple at least the rear pillars to the vehicle chassis and the rear roof part is pivotable about the linkage mechanism while in the forward position, claims 10, and similar language in claims 19 and 27 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3612

The drawings provided to date are not operative to perform the listed functions and do

have links that, at a lower end, are not connected to any structure, rendering the function

not show the claimed structure. The linkages in figure 2 and 6 are not the same linkages and

ineffective.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 10-15, 17-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Moscow Likhachev Car Wks ,MLCW, in view of Prosser.

3. MLCW has a rear roof part including rear window 3, slidable, but not pivotable, rear

pillars at either side of the rear window, and rear horizontal segment 2, forward roof part shown

in figure 4, and rear side elements shown in figure 5. MLCW lacks the claimed linkage

mechanism.

4. It would have been obvious to one of ordinary skill to provide in MLCW a pivoting as

well as sliding rear roof part as taught by Prosser in the alternative structure of figure 3 with rear

pillars at either side of the rear window, linkage mechanism in the horizontal cross bar at lower

end of the window/pillars and rear segment at "Dach" pivotal relative to the rear pillars and rear

window as seen in figure 2 with the rear segment atop the rear window in figure 3 in a body

receptacle in order to enhance an open air motoring experience. The rear roof part is slidable via

Art Unit: 3612

the linkage to a forward portion of the displacement path as seen in the "alternative" figure. The structure of MLCW is fully capable of having the rear segment pivotable relative to the rear pillars and rear window into the folded state while in the forward position.

- 5. As to claim 22, see the guide rails in the last figure.
- 6. Remaining claims are self-evident from the figures.

Response to Arguments

7. Applicant's arguments filed 8/12/2008 have been fully considered but they are not persuasive. Regarding the discussion of the "very flat" structure of Prosser, this is not relevant to the claims at issue. Regarding the discussion of the structure of Prosser being outside the vehicle space, this is deemed to be incorrect as the linkage and the guide are below the trunk lid, hence within the body.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3612

however, will the statutory period for reply expire later than SIX MONTHS from the date of this

final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dennis H. Pedder whose telephone number is (571) 272-6667.

The examiner can normally be reached on 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Glenn D. Dayoan can be reached on (571) 272-6659. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
